Portfolio Strategy

The Fund invests in a diversified pool of high-yielding corporate bonds and preference shares issued in the main by listed large-cap institutions, and asset-backed securities. All the Fund's investments are listed on at least one major exchange. The Fund aims to deliver a gross income (ex capital appreciation), of 5.5% annually, either paid in semi-annual instalments or reinvested in the Fund at investors' discretion. The Fund's assets can be denominated in a number of different currencies but are predominantly in GBP, USD and EUR. Currency exposure across non-GBP assets is hedged back into GBP and non-GBP share classes are hedged back into their base currencies on a rolling monthly basis. The Fund may take on a limited amount of leverage via derivatives and may invest in large cap high-yielding equities, but currently exercises neither of these options.

Manager's Commentary

The Fund continued its steady recovery in August, with a NAV uplift of 2.5%. It was a good month for equities (yet again) and for high yield, a less exciting month for government bonds and gold. August is an untrustworthy month, with limited market flows. However, so one should not set too much store by the actual numbers. The reality is COVID-19 continues to spread rapidly around the world and in the absence of a trusted vaccine. This will continue to stifle global economic recovery. Government / Central Bank stimulus is still by far the most important underpinning factor for the market. It remains to be seen what the economic and market reaction will be when some of the peripheral stimuli are tapered or removed altogether (e.g. the UK's Job Retention Scheme). At a portfolio level, Financials continued their strong run, and one of our other obligors received multiple takeover approaches, which sent their secured subordinated bonds some 7% higher.
