

Rudolf Wolff Income Fund

Regulated and Authorised by the Bermuda Monetary Authority

FACTSHEET 29 January 2021

IN TODAY'S INVESTMENT CLIMATE, THERE ARE A NUMBER OF PRESSING CONCERNS FACING THOSE WHO ARE SEEKING INCOME: LOW DIVIDEND YIELDS, INTEREST RATES, FALLING REAL ESTATE YIELDS AND UNCERTAIN BOND MARKETS.

RWIF vs STOXX 600, Oil Majors Index

GBP Dividend Reinvestment B Shares

In this chart we compare the fund to the Stoxx 600 and the BI Global Oil Majors index, against the Rudolf Wolff Income Fund GBP B Shares Dividend Reinvestment. As can be seen all oil related stocks have been extraordinarily depressed in the current price environment and, given the Fund's slight over-weighting in that sector, this has held back the recovery of the fund versus broader equities. However, we believe these prices do not represent the very low default risk present and instead show the considerable potential for uplift in the coming months.

As at 29 January 2021 data quoted represents past performance; does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Data for the Fund shown are Net of Charges 1/10/19 to 29/01/21.

Fund Commentary

The Fund has had a good start to 2021, outperforming major Equity and Investment Grade indices. Our oil-related positions were the main positive contributors to the 1.44% rise in NAV, along with a continued recovery in two of our UK-focused positions which have lagged the general market uplift. AA PLC is in the process of being purchased by a Private Equity consortium, which will result in their subordinated bond being redeemed early at Par, also a positive for the Fund performance-wise. Our blue-chip Financials holdings remain the bedrock of the Fund, but over the coming months we expect outperformance to continue to be generated by other segments of the portfolio, as we feel the recovery in most Financials is largely complete.

Portfolio Strategy

Invest in a weighted portfolio of income bearing financial instruments, preference shares and debt instruments issued by bank's, building societies and insurance/assurance groups, as well as general corporate debt. The Funds Bond strategy is designed to produce an attractive rate of income whilst maintaining the underlying asset value of investment. It may possibly suit those of your clients who are looking for higher returns than currently being offered by standard bank or building society deposit accounts. The income is distributed bi-annually, at the end of March and September. Investors may elect to have the income reinvested. The Fund does not at present utilise any leverage but may use limited leverage in the future. Currently approximately 69% of the Funds bond portfolio is in GBP issues, 28% in USD, and 3% in SEK.
